

KEYNOTE SPEAKER

Professor Lotta Rydhmer

speech on 19th of June 2017 at 16.30-17.30

"Tuning up sustainable organic production"

Lotta Rydhmer, Dept of Animal breeding and genetics, SLU, is Professor in animal breeding. She conducts research on animal breeding and genetics, mainly breeding for sustainable production, performs studies of genotype-environment-interactions and breeding for organic production and traits in farm animals important for welfare and traits related to environmental impact.

She works with data from commercial herds, SLU's research herd, breeding organisations' recording schemes and simulation studies. Currently professor Rydhmer is also working with sustainable agriculture and food production in SLU's interdisciplinary research platform "Future Agriculture - livestock, crops and land use".
